## PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on Linux system administration experience, including building and maintaining a self-hosted multi-service Linux server from scratch. Proven ability to diagnose and resolve system-level, network, and application issues through ongoing IT support since 2023. Experienced in server health monitoring, patch management, backup and image handling, and service availability maintenance. Proficient in Python scripting for automation and process improvement. Google Cybersecurity Professional Certificate holder. Seeking to apply Linux troubleshooting and operational skills in a monitoring desk and incident resolution role.

## EXPERIENCE

### IT Support (Volunteer / Personal)

2023 – Present

- Diagnosed and resolved Windows OS, boot, driver, network, and software issues for friends, family, and local users, serving as first point of contact for incident triage and resolution.
- Performed system backup and image management, including OS reimaging and restore operations on workstations.
- Managed operating system patch deployment and software updates to maintain system security and stability.
- Troubleshoot network connectivity issues including TCP/IP configuration, DNS resolution, printer sharing, and Wi-Fi problems.
- Documented recurring issues and applied preventive maintenance to reduce repeat incidents and improve system uptime.

### Data Analyst & Python Developer – Future Market Insights, Pune

Aug 2026 – Present

- Automated repetitive data workflows using Python scripts, reducing manual effort and improving turnaround time.
- Performed troubleshooting and issue resolution on data pipelines, automation processes, and reporting systems.
- Maintained documentation of methodologies, code changes, and process improvements for team traceability.
- Built interactive dashboards and analytical reports using Power BI and Excel for stakeholder reporting.

Previously: Data Analyst Intern at the same organization (Mar – Aug 2026).

## PROJECTS

### Self-Hosted Linux Server – Multi-Service Administration & Monitoring

- Built and administered a Linux server on a repurposed PC, hosting media (Jellyfin), music (Navidrome), and network-attached storage (NAS) for continuous service availability.
- Configured Samba (SMB) file-sharing protocol for centralized cross-device access across the local network.
- Implemented secure remote access via Tailscale mesh VPN without exposing inbound ports.
- Monitored server health, service uptime, and storage utilization; performed ongoing patch management and troubleshooting to maintain availability.
- Managed end-to-end server operations: networking, user access, storage, and application-level service configuration.

### Linux System Customization & Administration (Arch Linux)

- Installed and configured Arch Linux from scratch: disk partitioning, bootloader, base system, networking, and user environment.
- Configured i3 window manager, system services, audio, fonts, and desktop utilities into a fully functional daily-driver.
- Managed packages and system-level dependencies using pacman; resolved dependency conflicts and system breakages.

## TECHNICAL SKILLS

- Linux Administration:** Arch Linux, Debian-based; System installation, configuration, troubleshooting, performance tuning
- Server Operations:** Service deployment, uptime monitoring, patch management, backup & image handling, user access management
- Networking:** TCP/IP, LAN/WAN, DNS, DHCP, IP Addressing, VPN (Tailscale), Network Troubleshooting
- Programming & Scripting:** Python (automation, scripting), SQL
- Self-Hosting & Services:** Jellyfin, Navidrome, Samba/SMB, NAS, Virtualization (VMware)
- Security:** Network Security, Security Operations, Threat Detection, Risk Management (Google Cybersecurity Certificate)
- Tools:** Git, GitHub, VS Code, MS Office (Word, Excel), Power BI, VMware

## EDUCATION

### Savitribai Phule Pune University, Pune

2026

Bachelor of Computer Engineering

### LVH Panchavati, Nashik

2022

Higher Secondary Certificate (HSC) | Percentage: 61.5%

## CERTIFICATIONS

### Google Cybersecurity Professional Certificate

Topics: Linux, SQL, Network Security, Incident Response, Security Operations, Risk Management, SIEM, Cyber Threats

## INTERESTS

Home lab & self-hosting · Linux customization · Networking technologies · Cybersecurity research
